

CloudGate Cellular Gateways WiPOM Technology

In addition to our own wireless products, the WiPOM Technology is being adopted by other component manufacturers, notably Option, in their [CloudGate](#) line. They began with one WiPOM Technology peripheral expansion board and now offer seven different such boards. The [CloudGate](#) modules now have the most versatile [peripherals](#) available.

Featured Product: Monnit Gateway

The highly popular line of wireless sensors by [Monnit](#), are now more versatile and easy to use with [CloudGate gateways](#) and BiPOM's wireless [peripheral boards](#). The new WRTU (Wireless RTU) software library of interfaces/drivers can reside on the WiPOM cards. The WRTU Library is available directly from CloudGate suppliers and from BiPOM on WiPOM products.

BiPOM becomes a T-Mobile Reseller for M2M Business Plans

1 Gigabyte (yes Gigabyte!) data from \$12/month
Larger [plans](#) up to 13 GB available
No overage charges
Unlimited SMS
Static IP Options
High speed LTE

Easy to Get Started!

- 1 Select the CloudGate and peripheral boards for your remote monitoring and control
- 2 Subscribe to a BiPOM Cellular Data Plan
- 3 Install CloudGate and start monitoring your devices and sensors on BiPOM Web Portal

CloudGate 3G, LTE, GPS

PLC + Data Logger + I/O

BLE + XBee

Telematics + CAN + I/O

RS485 + RS232

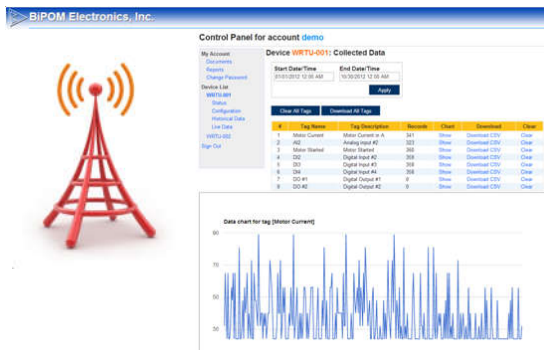

Monnit 900MHz

Dual RS232 + USB+ uSD

4-port Ethernet PoE

BiPOM Web Portal - [WiPORTAL](#)

For customers who do not have an extensive IT Department yet need real-time remote data reporting and critical "Alerts", BiPOM now offers [WiPORTAL](#). It is a simplified, low-cost, cloud/server service that provides timely and critical information 24/7. This service has been in operation for over three years with a few select customers. It has been proven effective, reliable, low-cost and yet provides easy, password protected access, real-time data and immediate alerts with customer selected thresholds. Custom formats and alerts are provided to fit individual customer needs. If you have CloudGate or other BiPOM wireless systems, this is immediately available. Please contact sales@bipom.com for signing up.

Applications

- Oil & Gas
- Irrigation
- Metering
- Energy
- Machine Protection
- Factory Automation

BiPOM and Metrologics at 2016 ENTELEC Conference and Exhibition

This was BiPOM's fourth year to exhibit at this excellent conference (speakers and technical papers/presentations), and while attendance was lower than last year, BiPOM experienced more qualified interest than before. Far more people were interested in the cost savings potential of remote monitoring and control this year. BiPOM already has customers that have installed wireless WiPOM Technology BiPOM systems, CloudGate, or combinations of both, specifically for cost savings. In addition to operating and labor cost savings, there is a notable increase in uptime with complete cost recovery within the first 6 months of operation. BiPOM also introduced one of its key business partners, Metrologics, LLC. (www.metrologics.net) at our booth. Metrologics, with more than 40 years of experience in systems integration, provides direct worldwide customer support for wireless systems including system packaging, installation, training, and field support. And of course they are experts on BiPOM and CloudGate products as well as a wide variety of other compatible sensors and wireless products. Look for more details in the next BiPOM Newsletter.
