Cloudgate Configurations LoRaWAN Sensor Activation LuvitRED

Integration Steps

Cloudgate Configurations

Cloudgate requires one time setup for the LuvitRED installation to enable LoRaWAN functionality. After the one time setup, user can skip Cloudgate Configuration steps.

To realize configurations, go to <u>https://cloudgateuniverse.com/library</u> and download the latest firmware and LuvitRED application. Choose which firmware to download according to your Cloudgate model.

1. View firmware and download it according to your Cloudgate model.

	Firmware 9 firmwares View firmware
	Radio Firmware 8 radio firmwares View radio firmware
\mathbf{c}	Configurations 2 configurations View configurations
G	Applications 12 applications View applications

2. View applications and click on Option LuvitRED 2.0

Option LuvitRED 2.0

Easy-to-use graphical, "drag and drop & visual wiring" configuration environment for design and deployment of smart M2M and IoT Solutions on CloudGate. This version of LuvitRED has to be used together with Option CloudGate firmware 2.x.x!

Available for: All groups

3. Download the latest version

Ξ	Option LuvitRED 2.0 Easy-to-use graphical, "drag and drop & visual wiring" configuration environment for design of smart M2M and IoT Solutions on CloudGate. This version of LuvitRED has to be used toge CloudGate firmware 2.x.x!	n and deployment ther with Option <u>Release notes</u>
Versions		
2.27.1	÷.	<u>What's new</u>
2.27.0	<u>*</u>	What's new
2.26.1	<u>*</u>	What's new

4. Now we are ready to complete configurations of Cloudgate. Once you open the Home Page of Cloudgate go to Provisioning tab and upload files we have downloaded.

	Innecting THINGS to the cloud
A Home Interfaces - Firewall	Connection Persistence Provisioning System Plugins - VPN
Check for updates >	Device Provisioning
Upload device provisioning file	
Settings >	Check for updates
	Note: this will automatically install updates to the gateway, even when automatic provisioning has been disabled. "Check for updates" can cause data traffic on your wireless operator subscription.
	Check for updates
	Upload device provisioning file
	Select file Dosya Seç Dosya seçilmedi
	Upload

Once the process done, you should be able to see related files on the home page.

Firmware version: Option mini micro Firmware - 2.98.2 Image version: Option LuvitRED 2.0 - 2.27.0

LoRaWAN Sensor Activation LuvitRED

After completing one time setup, "LuvitRED" option will be shown under the "Plugins" tab. The user can access to LuvitRED by clicking "Plugins -> LuvitRED". A new screen appears after clicking "Plugins -> LuvitRED". Click on the "Advanced Editor" to access LuvitRED.

	🕒 Log out	OPTION

Flow Configuration

www.bipom.com

As a next step we will enter "Device EUI" and "App Key" to connect our sensor.

Firstly, double click on "bulk import OTA" node and enter name, device EUI, and application key, as string.

Wireless Solutions for the Real World

Here is an example

Edit tem	nplate node				
Delete	•			Cancel	ОК
💊 Nan	ne	bulk import OT.	A		
💩 Tem	nplate				
2	"deviceNam	е", "123456",	"654321"		

Wireless Solutions for the Real World

Once it is done click "OK" and double click "Device" node and enter Device EUI and Application Key into related sections.

Edit lora device node				
Delete	Cancel			
Name Name				
¢ [®] Application	LoRa Application 🗸			
🞤 Class	A ~			
J Activation	Over the Air 🗸			
Sev EUI	******			
🕰 App Key	*******			
FPort •	1			
	Send confirmed downlink data			
	Enable Adaptive Data Rate			
🛍 Delete node	type delete here and push trash			

Wireless Solutions for the Real World

Lastly enter your Device EUI to the following functions.

Name Reset Sensor 1 -- Create a payload 2 local data = msg.payload 3 p(data) 4 - msg.app = { 5 que<u>ue = {</u> 6 -['645367566B597033'] = { 7 data=data, 8 fport = 0X0A, 9 confirmed = false 10 * } 11 * } 12 ^ } 13 return msg Call with empty message on startup ? ٠ X Outputs 1 •

Name Set Interval 1 -- Create a payload 2 local data = msg.payload 3 p(data) 4 * msg.app = { que<u>ue</u> = { 5 -6 -['645367566B597033 = { 1 7 data=data, 8 fport = 0X08, 9 confirmed = false } 10 -11 * } 12 ^ } 13 return msg Call with empty message on startup? ۰ X Outputs 1 •

Wireless Solutions for the Real World

Now you can deploy the application by pressing the "Deploy" button which is located on the top right of the page. Once you activate your sensor, it will join to the network and start to send data.

From now on, user can use debug screen to see payload.
