CloudGate micro

LTE CAT4

AVAILABLE WITH OPTIONAL WiFi, LoRaWAN or BATTERY

Cost-efficient & effective world-wide LTE connectivity

- Worldwide LTE Cat 4 Programmable Multicarrier Gateway with 3G fallback
- Industrial and building automation protocol converter
- Secure Remote Access
- Connectivity back-up
- Optional WiFi or LoRaWAN or Battery backup

OPTION

Smart bit pipe

It serves as a smart bit pipe to the internet and easily connects any device to the Cloud via its Ethernet ports.

Connectivity back-up

It ensures connectivity back-up. Connect its WAN port to an ADSL or cable modem and its LAN port to the router. When the WAN port loses connection, its LTE modem will take over so internet access is always secured.

Secure remote access

CloudGate micro provides remote access over a secure VPN tunnel to the Ethernet device(s) connected to its LAN Ethernet ports.

CloudGate 4.0 next generation

CloudGate 4.0 IoT gateways were designed with CloudGate's signature features; including ruggedized design housing, industrial grade temperature ranges, timed wake-up and ignition sensing, sim connection, passive and active GPS antenna support and all are LuvitRED enabled.

NEW! CloudGate 4.0 next generation IoT gateways now feature world-wide connectivity, optional Li-ion battery, and micro-SD holder

CloudGate micro ex-factory options

CloudGate micro has a board-to-board connector on its main board that can be used to mount one of these optional expansion cards:

- Battery plug-on card
- LoRaWAN plug-on card
- WLAN plug-on card

These plug-on cards are installed during production*.
