Skywire® LTE CAT1
Product Change Notification

NimbeLink Corp

Updated: October 2018

Table of Contents

1. Introduction

The NL-SW-LTE-GELS3 Skywire® modem was originally manufactured using Gemalto firmware version 4.3.1.0. Gemalto has since released new firmware for mass production, release 4.3.2.0-25421, which includes many updates including support for PPP over UART, enhanced AT command set, and TLS stack support.

Please note the AT command to check firmware has changed from:

ATI

to

ATI1

Issuing **ATI** on the NL-SW-LTE-GELS3 running firmware 4.3.1.0 will return an **ERROR**.

2. Migration Overview

Customers with existing products can update to version 4.3.2.0-25421 via a firmware update procedure, example procedure provided in application note 30162 Skywire LTE CAT1 Release 2 Firmware Update:

https://nimbelink.com/Documentation/Skywire/4G_LTE_Cat_1/30162_NL-SW-LTE-GELS3_Rel2FirmwareUpdateAppNote.pdf

All new orders should use part number NL-SW-LTE-GELS3-B which is specific to firmware version 4.3.2.0-25421.

Updated documentation for firmware version 4.3.2.0-25421 can be found on the product page here: http://nimbelink.com/skywire-4g-lte-cat-1/#docs

3. Last Time Buy Date

NL-SW-LTE-GELS3 devices with firmware 4.3.1.0 as well as the underlying Gemalto module can no longer be purchased.

All existing orders should move to NL-SW-LTE-GELS3-B.
